

## Enterprise License Program

The ever-increasing pace of business places new demands for greater flexibility, efficiency, and accountability every day, especially where enterprise networks are engaged. As the industry's first and most trusted solution for seamless file and print sharing between Mac desktops and Windows servers, ExtremeZ-IP provides a highly stable and scalable platform that meets the changing needs of your company. With the Enterprise License program (ELP) we give you the tools to extend world-class IT service delivery throughout the enterprise while driving down costs.

ELP is a per-Mac based pricing model designed to be a cost-effective licensing solution for medium to large-scale enterprises, as well as government, K-12 and higher education institutions. ELP allows for quick and easy deployment of our Mac/Windows file sharing solutions across your enterprise Windows Server infrastructure - all with a single service contract and license key. As an added benefit, all upgrades and support are included in the program.

The ELP program was designed to decrease the Total Cost of Ownership (TCO) and increase ROI of the entire IT infrastructure by giving organizations the ability to:

- » Deploy file servers more quickly by eliminating the need to procure new software each time a server is deployed – under the ELP you can deploy on an unlimited number of servers
- » Leverage the built-in cost-effectiveness and economies of scale inherent in the ELP pricing model
- » Reduce administrator software asset management time and costs through single license key, single support contract and inclusion of all upgrades and support
- » Leverage built-in product support for existing enterprise systems management solutions such as Microsoft Systems Center and PerfMon to monitor ExtremeZ-IP servers
- » Eliminate redundant Mac/Windows file sharing solutions
- » Fully integrate Macs into Windows Server infrastructures (including Active Directory, DFS, etc.) with a single product deployed enterprise-wide

### What is ExtremeZ-IP?

ExtremeZ-IP is a Windows-based file and print server that allows your organization to preserve the innovative "Mac experience" for your end users, while simultaneously integrating them fully into your Windows Server infrastructure.

Whether it's security policies, Active Directory integration, performance, scalability or manageability and monitoring options, ExtremeZ-IP allows you to deliver enterprise-class services that your Mac users require. This reduces help desk calls and increases productivity - saving you time and money.

As the proven standard for file sharing between Mac desktops and Windows servers, ExtremeZ-IP is the most trusted solution and a "must have" for mixed Mac and Windows computing environments.

### Who uses ExtremeZ-IP?

Since 1999, ExtremeZ-IP's compatibility, ease of use, performance and reliability has made it the Mac connectivity tool of choice in over 4,000 organizations worldwide from small businesses, to a "Who's Who" of Media, Publishing, Fortune 500, and Education leaders.

*"ExtremeZ-IP has a great reputation and a seamless operation, so we are using ExtremeZ-IP for file sharing and printing."*  
Atif Sheikh, CIO Europe, Middle East and Africa  
TBWA Worldwide

### **What advantages does ExtremeZ-IP deliver?**

ExtremeZ-IP's rich feature set includes:

- » Supports all releases of the Mac operating system from Mac OS 9 to Mac OS X 10.5 (Leopard)
- » Full support for native Mac OS X AFP protocol including long file names, large files and Unicode.
- » Flexible file name policy enforcement
- » Active Directory integration, including Single-sign on, full support for Active Directory permissions and password policies
- » Support for blazing search speeds without impacting the server performance
- » Advanced caching to minimize the impact of Mac file operations on servers
- » Support for Auto-reconnect
- » Support for Time Machine
- » Support for Microsoft Clustering and virtualization
- » Support for Distributed File System
- » Support for Network Spotlight

### **How difficult is it to implement ExtremeZ-IP?**

Installation of ExtremeZ-IP is simple, and does not require you to shut your server down. Installation times can range from a few minutes on a single server, to slightly longer for more complex clusters. You will also have the option to migrate existing SMB and SFM shares to ExtremeZ-IP with a single mouse click. Tech support and professional services are available to assist you with your implementation.

### **Can I test ExtremeZ-IP before buying it?**

Yes! Simply download the 21-day trial from our web site. You will get a full-featured version of the product and access to our pre-sales technical support should you have any specific questions about deploying ExtremeZ-IP in your environment.

### **How can I request a quote?**

You can visit our web site to request a personalized ELP quote. You can also contact us at +1-800-476-8781 or [ezipsales@grouplogic.com](mailto:ezipsales@grouplogic.com).

### **Where can I find out more technical information about ExtremeZ-IP?**

You can visit our web site for white papers and webinars, as well as to search our Knowledge Base. You can also contact us at +1-800-476-8781 or [ezipsales@grouplogic.com](mailto:ezipsales@grouplogic.com).

### **About Group Logic**

Group Logic is the leading provider of network software solutions that enable customers to gain strategic value, increase productivity and leverage existing infrastructure investments through enterprise file transfer and Mac/Windows connectivity solutions. With more than 20 years of unmatched experience, Group Logic's emphasis on customer success is the very core of its business. More than 4,000 customers trust Group Logic every day to move and share their files around the world.

Move digitally. Share globally.
